

Lio

Design: Vistosi

Description

The Lio Suspension Lamp is a minimalist lighting system featuring a hand-blown cylindrical glass diffuser. The shade is manufactured using a specialized technique that traps an opaque white glass band between crystal layers, ensuring a soft, diffused glow with clear-glass detailing at the extremities. The fixture is mounted on a satin nickel metal structure and is available in three formats. This Italian-made collection is cETLus listed and IP20 rated, providing a sleek and functional decorative solution for both residential and commercial interior specifications.
