

Asia

Design: Pier Luigi Frighetto

Description

The Asia chair collection evolves into a versatile seating solution designed to transition effortlessly between office, contract, and residential environments. Its refined proportions and balanced silhouette convey a sense of executive sophistication while maintaining a light and practical presence.

Its slender base enhances both visual lightness and functional stability, supporting smooth movement and dynamic usability. The swivel and tilting mechanisms provide ergonomic flexibility, ensuring comfort across different settings and daily uses. This thoughtful combination of aesthetics and performance aligns the lounge chair with contemporary designer furniture that prioritizes both form and functionality.

Formal elegance defines the overall composition, with carefully considered details that enrich its refined character. The harmonious balance between structure and comfort transforms the chair into a distinguished addition to offices, meeting rooms, or sophisticated home environments.

Made in Italy.
