

Lin

Design: Claudia Campone & Martina Stancati

Description

Lin Console is a statement piece where sculptural design meets material richness. Its refined silhouette highlights the expressive character of the top, available in quartzite, marble, or back-lacquered glass, each bringing depth and personality to the composition. The bold yet balanced presence positions Lin within curated designer furniture selections, conceived for sophisticated interiors with a strong visual identity.

The slender steel legs create a playful sculptural effect, supporting the top with lightness while maintaining structural precision. Their dynamic geometry contrasts with the solidity of the surface, producing a harmonious interplay between mass and movement. This careful balance of forms reflects the craftsmanship and refinement associated with premium luxury brand furniture, designed to elevate contemporary spaces.

With its architectural proportions and distinctive materials, Lin Console integrates seamlessly into highly demanding environments. Whether placed in an entryway, living area, or contract setting, it enhances the composition with elegance and character. The result is a refined accent within luxury home furniture interiors, where functionality and sculptural design coexist in perfect equilibrium.

Made in Italy.
