

India

Design: Enrico Pasa

Description

Bold and refined, the India sideboard creates a striking dialogue between classic lines and expressive design. Its sculptural composition is defined by a daring curved door that introduces movement and visual rhythm, transforming the piece into a statement element. The calibrated use of color enhances its architectural presence, positioning India within the world of premium luxury brand furniture designed for sophisticated living spaces.

The flowing curvature of the door acts like a soft, dynamic curtain, enveloping the structure and emphasizing the harmonious balance of forms. Carefully considered proportions and refined materials create depth and character, while subtle detailing enriches the overall composition. This thoughtful design approach reflects the aesthetic sensibility of curated designer furniture, where innovation meets timeless elegance.

Distinctive yet versatile, the India sideboard enhances contemporary living areas with its sculptural presence and refined craftsmanship. Its elegant silhouette integrates seamlessly into sophisticated interiors, offering both functionality and decorative appeal. Made in Italy.
