

Mai Tai

Design: Claudia Campone & Martina Stancati

Description

MaiTai is an iconic bar cabinet designed for refined interiors where relaxation and conversation take center stage. Its sculptural silhouette combines elegance and structure, with twisted metal legs creating a dynamic interplay that visually elevates the cabinet. The composition expresses the sophistication typical of luxury brand furniture, transforming a functional element into a striking focal point for curated living spaces.

The structure is crafted in curved plywood with lacquered MDF panels, creating smooth, continuous surfaces that emphasize the cabinet's flowing form. A stainless steel base and handle reinforce the architectural clarity of the design, while the refined handle detail offers both practicality and aesthetic balance. This careful integration of materials and proportions reflects the craftsmanship associated with premium designer furniture.

Inside, MaiTai reveals a carefully organized space conceived for mixing drinks with style. The mirrored back panel enhances depth, while an integrated diffused LED lighting system with sensor switch illuminates the interior. An extra-clear glass shelf and a Canaletto walnut drawer with sliding shelf provide practical storage solutions. With its sculptural presence and thoughtful functionality, MaiTai becomes a standout element within sophisticated luxury home furniture environments. Made in Italy.
