

Mai Tai

Design: Claudia Campone & Martina Stancati

Description

MaiTai Cupboard reinterprets the iconic silhouette of the collection in a larger storage solution, balancing sculptural presence with everyday functionality. The dynamic metal base create a refined sense of movement while supporting the generous volume of the cupboard, achieving a harmonious equilibrium between lightness and capacity.

The structure is crafted in curved plywood with lacquered MDF panels, creating fluid surfaces that enhance the cabinet's elegant proportions. A stainless steel base and coordinated handle reinforce the visual rhythm of the design, while maintaining practical usability. The careful balance of materials and geometry reflects the craftsmanship associated with premium designer furniture, combining structural clarity with refined aesthetics.

Inside, the cupboard reveals an organized and luminous interior designed for both storage and display. A mirrored back panel enhances depth, complemented by an integrated diffused LED lighting system with sensor switch. An extra-clear glass shelf and a Canaletto walnut drawer with sliding shelf provide functional versatility. With its sculptural elegance and generous storage, MaiTai Cupboard integrates seamlessly into curated luxury home furniture environments, expressing refined conviviality and timeless sophistication. Made in Italy.
