

## Alma Plurima

### *Description*

Alma Plurima interprets light through a refined horizontal composition, where sculptural glass elements align to create a continuous and elegant luminous line. The combination of blown glass and pleated fabric diffusers produces a soft, layered glow that enhances the perception of space. The repetition of volumes creates rhythm and depth, while the diffused illumination ensures a welcoming atmosphere. This thoughtful design approach aligns with the standards of designer lighting, where aesthetics and performance coexist seamlessly.

The suspension system is supported by two steel cables, ensuring stability and precise alignment. An optional extended cable is available to accommodate different ceiling heights and installation requirements, offering added versatility.

Made in Italy.

**Light source:** 1 x 75W - Custom LED Strip - 9390 Lm - 2700 K - CRI: >90 - TRIAC dimmer

### *Finishes & Materials*

**Internal Diffuser:** Pleated Fabric.

**External Diffuser:** Blown Glass.
