

Baggy

Design: Paola Navone - Otto Studio

Description

Baggy is an eclectic lighting collection defined by an informal and playful mood, inspired by the relaxed volume of oversized trousers. Designed as a series of individual modules in different sizes, it offers complete freedom of composition, allowing dynamic and personalized arrangements. This creative flexibility transforms the lamp into a sculptural centerpiece, perfectly suited to expressive interiors and refined luxury furniture collection concepts.

The Baggy horizontal suspension lamp features a double-satin polycarbonate diffuser with the irregular appearance of a crumpled paper tube, creating a soft and organic visual effect. Suspended by a distinctive textile cord that reflects the brand's archi-decorative stylistic language. The horizontal configuration enhances large spaces and integrates seamlessly into interiors curated with designer furniture, where lighting becomes part of the architectural composition.

What makes Baggy truly unique is its organic form combined with LED technology custom-made for the lamp's internal geometry, emitting light in a magical and unexpected way. The collection offers exceptional flexibility for grand interiors, with a standard cable length of 74"3/4 and an optional extension up to 196"7/8, allowing versatile installation possibilities. Ideal for sophisticated environments and curated living room sets, the Baggy horizontal suspension lamp delivers both sculptural presence and atmospheric illumination.

Made in Italy.

Finishes & Materials

Diffuser: Polycarbonate.

Ropes: Fabric.

Cable: Transparent.
