

Baggy

Design: Paola Navone - Otto Studio

Description

Baggy is an eclectic lighting collection defined by an informal and playful mood, inspired by the relaxed volume of oversized trousers. Conceived as a series of individual modules in different sizes, it allows complete freedom of composition and encourages creative, expressive arrangements. This playful yet refined approach transforms the lamp into a sculptural feature, perfectly suited to interiors curated within a luxury brand environment.

The Baggy vertical suspension lamp features a double-satin polycarbonate diffuser with the irregular appearance of a crumpled paper tube, creating a soft and organic silhouette. Its elongated vertical configuration enhances spatial height while providing diffused, atmospheric illumination. The clean and balanced proportions allow the lamp to integrate seamlessly into interiors styled with designer furniture, where lighting plays both a functional and decorative role.

What makes Baggy distinctive is its organic form combined with LED technology custom-made for the lamp's internal geometry, which emits light in a magical and unexpected way. This refined yet playful lighting solution adapts effortlessly to contemporary spaces, adding sculptural presence and warmth. The collection offers exceptional flexibility for grand interiors, with a standard cable length of 74"3/4 and an optional extension up to 196"7/8. Ideal for sophisticated settings and curated living room furniture sets, the Baggy vertical suspension lamp offers both versatility and visual impact.

Made in Italy.
