

Bianca

Design: Dainelli Studio

Description

Bianca draws inspiration from the symmetrical geometry of snowflakes, translating this natural harmony into a refined luminous composition. Its radiating arms create a balanced and elegant silhouette, transforming the lamp into both a functional source of light and a decorative statement. With its sculptural presence and refined proportions, Bianca reflects the sophistication of premium luxury lighting fixtures designed to elevate contemporary interiors.

The tubular light source in milky white glass delivers soft, diffused illumination that enhances the surrounding atmosphere with warmth and clarity. Equipped with a custom-made tubular LED bulb and low-voltage socket, the lamp combines aesthetic refinement with technical precision. This thoughtful integration of design and performance aligns Bianca with curated designer lighting, where innovation and elegance coexist seamlessly.

A rotating arm with a 70° movement on each side adds versatility, allowing light to be directed with precision while maintaining visual balance. This dynamic feature enhances usability without compromising the lamp's clean architectural lines. Elegant and adaptable, Bianca stands out among sophisticated high end light fixtures, bringing a distinctive and refined character to modern living and contract environments.

Made in Italy.

Light source: 1 x 9.4W - Custom tubular LED bulb - E12 (included) 24V - 1 x 950 Lm - 2700 K - CRI: >80 - Dimmer on board

Finishes & Materials

Diffuser: Glass.

Frame: Metal.

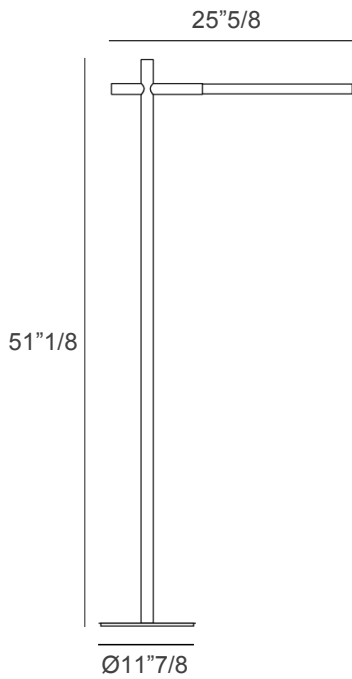

Cable: Dark brown fabric.
