

Bianca

Design: Dainelli Studio

Description

The Bianca linear wall light enhances surfaces with a minimal yet sophisticated design, combining architectural clarity with refined decorative appeal. Inspired by the symmetrical beam structure of snowflakes, its luminous arms create a balanced composition that adds rhythm and elegance to the wall. With its clean geometry and sculptural presence, this fixture reflects the sophistication of premium luxury lighting fixtures for contemporary interiors.

The tubular light sources, crafted from milky white glass in three different sizes, provide soft and evenly diffused illumination. Their varied proportions introduce subtle visual movement while maintaining harmony within the overall design. Specially developed for the collection, these elements highlight the thoughtful balance between aesthetics and functionality typical of curated designer lighting.

The Bianca linear wall light offers flexible installation options, with the driver available either integrated into the base or as a remote driver without base. This versatility allows it to adapt to different architectural requirements while maintaining a clean and elegant appearance. Both functional and visually striking, it stands out among contemporary lighting fixtures, adding elegance and sophistication to its surroundings.

Made in Italy.

Light source: 1 x 5.6W + 1 x 9.4W - Custom tubular LED bulbs - E12 (included) - 24V - 1 x 500 Lm + 1 x 950 Lm (1450 Lm) - 2.700 K - CRI >80 - Triac Dimmer
