

Bianca

Design: Dainelli Studio

Description

Bianca table lamp draws inspiration from the symmetrical geometry of snowflakes, translating this natural balance into a refined luminous composition. Its radiating arms create a sculptural yet harmonious silhouette, transforming the lamp into an elegant decorative accent. With its sophisticated proportions and distinctive presence, Bianca embodies the character of premium designer lighting for contemporary interiors.

The tubular light source in milky white glass delivers soft, diffused illumination, enhancing the surrounding atmosphere with warmth and clarity. Equipped with a custom-made tubular LED bulb and a low-voltage socket, the lamp integrates technical precision with aesthetic refinement. This thoughtful balance between performance and design aligns Bianca with curated luxury home lighting, where functionality meets timeless elegance.

Designed to be used as a reading lamp, Bianca features a rotating arm offering 70° movement on each side, allowing for precise light direction. This dynamic functionality enhances versatility while preserving the lamp's clean architectural lines. Both practical and visually striking, it stands out among sophisticated high end light fixtures, adding elegance and character to refined living spaces.
