

Calypso

Design: Servomuto

Description

Inspired by the Art Deco period—whose most iconic expression emerged in the 1920s with a modern, geometric aesthetic—the Calypso Wall lamp blends structured fabrics and vibrant patterns into a striking decorative statement. Drawing inspiration from South American and tropical cultures, the design combines color, texture, and rhythm to create an eclectic yet refined composition. The result is a visually distinctive lighting piece that enhances interiors curated within a luxury furniture collection.

The wall version is characterized by a slim, elegant arm that supports the lamp with understated sophistication. Its balanced proportions and sculptural presence emphasize the decorative fabric shade, transforming the fixture into both a functional light source and an artistic element. This harmonious blend of form and pattern integrates seamlessly into interiors featuring designer furniture, where bold accents and curated details define the atmosphere.

The collection is further enriched by the Sahara colorway, a sophisticated combination of soft, dusty tones. Warm earthy hues and geometric motifs with a subtle tribal inspiration create inviting and intimate environments while offering versatile styling possibilities. This refined palette makes the Calypso Wall lamp ideal for enhancing contemporary spaces and coordinated living room furniture sets with a touch of eclectic elegance.
