

Flexiled

Design: King & Roselli

Description

Flexiled is a historic and iconic product within the Contardi collection, celebrated for its refined functionality and timeless design. Available in two distinctive variants—one with a flexible arm covered in leather with double-side stitching, and the other encased in a steel mesh wrapped in a transparent sheath—it offers a sophisticated balance between craftsmanship and technical precision. Its elegant versatility makes it a perfect fit for interiors curated within a luxury furniture brand environment.

Distinguished by exceptional quality standards, Flexiled features a flexible brass arm engineered for durability, smooth movement, and silent performance, remaining free from squeaking even after extended use. It also offers an optional fabric cable with plug of 78"3/4, with the possibility of exiting from either the back of the base or the bottom of the base. Its highly adjustable structure allows precise and comfortable illumination, ideal for bedside reading and intimate spaces. This thoughtful design integrates seamlessly into interiors styled with designer furniture, where both aesthetics and functionality are essential.

Advanced engineering and LED heat dissipation technology ensure that the head maintains safe temperature levels, even after 24 hours of continuous operation, guaranteeing long-term reliability and comfort. Highly customizable in colors and sizes, Flexiled adapts effortlessly to a wide range of design needs. Sold as a set of two and available with or without a switch, it enhances sophisticated interiors and curated living room furniture sets with precision lighting and timeless decorative appeal. Made in Italy.
