

Fly

Designer: Massimiliano Raggi

Description

With bold expressive force, Fly transforms its graphic design into a sculptural element that both illuminates and captivates. Its clean, architectural line introduces a refined visual presence, making it suitable for a variety of residential, commercial, and hospitality settings. Elegant and contemporary, this piece reflects the sophistication of premium designer lighting created to enhance modern interiors.

The luminous bar is delicately softened by a cotton textile diffuser available in light or dark tones, creating a warm and balanced glow. This refined layering of materials adds depth while maintaining the lamp's minimalist character. The thoughtful interplay between structure and diffusion aligns Fly with curated luxury lighting fixtures, where aesthetics and atmosphere are carefully integrated.

Featuring dual light emission, both upward and downward, Fly provides versatile illumination that enhances spatial perception and comfort. The suspension system is supported by two steel cables, ensuring stability and precise alignment. An optional extended cable is available to accommodate different ceiling heights and installation requirements, offering added versatility. With its distinctive silhouette and refined lighting effect, it stands out among contemporary lighting fixtures, delivering elegance and visual impact in sophisticated environments.

Made in Italy.
