

G+T

Design: Jan Van Lierde

Description

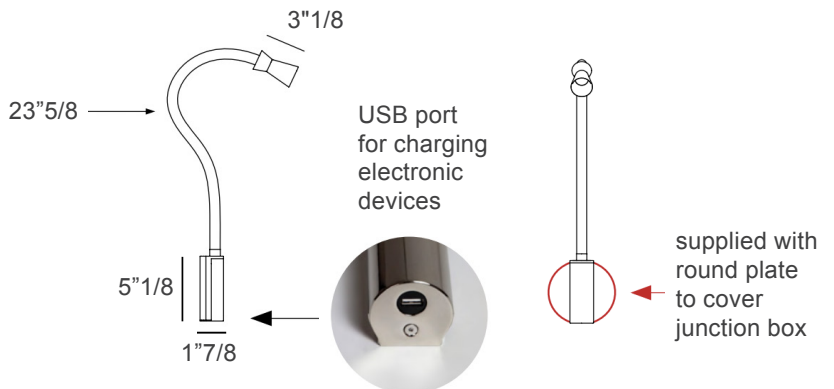

An innovative reading lamp, G+T Wall is conceived as a portable and luxurious solution designed to meet specific space and installation requirements. The lamp's head echoes the design of a cocktail jigger—an intentional reference reflected in its name, G+T (Gin & Tonic)—while the flexible arm, crafted in brass and covered in woven leather, adds both tactile richness and precise adjustability. G+T Wall features a control with three intensity levels conveniently positioned on the head, allowing intuitive and customizable lighting. Additionally, a USB Type-C port located beneath the base provides practical functionality for charging smartphones or tablets. This wall lamp is sold as a set of two, making it ideal for bedside placement. Made in Italy.

Dimensions

1"7/8D x 5"1/8H + 23"5/8H (Flexible Arm)

Light source:

1x3W - LED module - 500 Lm - 2700 K - CRI >90 -
3 intensity level control on the head (100% - 70% - 30%)
