

Manhattan

Design: Contardi Studio

Description

Manhattan is a metropolitan reading light that perfectly balances classic elegance with contemporary functionality. Its refined design combines clean architectural lines with practical versatility, creating a sophisticated lighting solution for modern interiors. Compact yet distinctive, it enhances spaces curated within a luxury furniture collection while delivering precise and comfortable illumination.

Designed for bedside use or direct installation on the headboard, Manhattan is characterized by a double-jointed arm that moves both on the axis of the base and at the joint between the two arms. This flexible structure allows highly adjustable positioning for personalized reading comfort, while the head itself is also adjustable up to ± 30 degrees for even greater precision. It also offers an optional fabric cable with plug of 78"3/4, with the possibility of exiting from either the back of the base or the bottom of the base. Its functional design integrates seamlessly into interiors styled with designer furniture, where performance and aesthetics are equally important.

Available with or without a switch, Manhattan adapts effortlessly to different installation requirements and lifestyle needs. Sold as a set of two, it is ideal for creating balanced bedside compositions and symmetrical lighting arrangements. Its timeless versatility makes it a perfect addition to elegant bedrooms and curated family room furniture environments, offering focused light with refined metropolitan style.

Made in Italy.

Light source: 1x3W - LED module - 500 Lm - 2700 K - CRI >90
