

## Picchio

*Design: Alessandro Munge*

### *Description*

Inspired by the graceful movement of the woodpecker, the table lamp reinterprets functional lighting as a sculptural and interactive object.

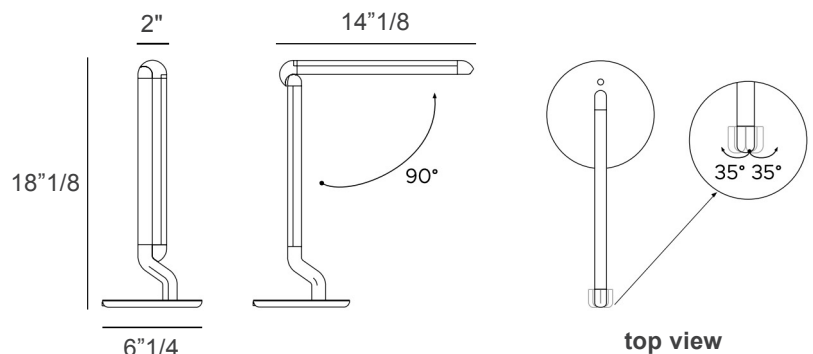

The table version features a 90-degree opening from the side view, allowing the arm to extend smoothly for optimal task lighting. From the top view, the arm provides controlled lateral movement with a 35-degree rotation on each side, ensuring precise and ergonomic light direction.

Ideal for refined residential environments and high-end contract applications, the lamp combines versatility with understated sophistication. Its sculptural presence enhances desks, bedside tables, and accent surfaces, while its dynamic movement adapts to different lighting needs. Made in Italy.

**Light source:** 1x3W LED module 500 Lm - 2700 K - CRI >90

### *Dimensions*

From 6"1/4D to 14"1/8D x 18"1/8H

### *Finishes & Materials*

**Frame:** Metal.

**Frame Details:** Leather.

**Cable:** Fabric.
