

Picchio

Design: Alessandro Munge

Description

Inspired by the graceful movement of the woodpecker, this refined collection reimagines the reading lamp as a sculptural and interactive lighting solution. Its sophisticated design blends precision engineering with fluid elegance, creating a dynamic object that delivers ergonomic and poetic illumination. The result is a distinctive piece that enhances contemporary interiors while embodying the essence of a luxury furniture brand.

Available in both wall-mounted and table versions, the lamp features a carefully engineered structure that allows a 90-degree opening from the side view, ensuring optimal adjustability for focused lighting. From the top view, the rotating arms provide dual 90-degree movement, offering exceptional flexibility and personalized positioning. This premium functionality, combined with its elegant silhouette, makes it a perfect complement to interiors curated with designer furniture.

Designed for refined residential spaces and sophisticated contract environments, the collection balances technical innovation with elevated aesthetics. Available with either a remote driver or driver on board, it ensures installation versatility without compromising its sleek form. Ideal for modern interiors and coordinated living room furniture sets, this lighting solution delivers both visual sophistication and functional performance.

Made in Italy.
