

Stick

Design: Studiopepe

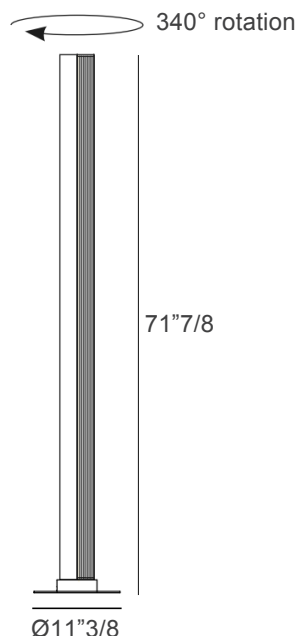

Description

Inspired by the purity of geometric forms, the Stick floor lamp originates from a simple triangular-section module repeated to create a striking yet minimal composition. The floor version emits a skillfully modulated light through a diffuser with a sophisticated ribbed glass effect, enclosed within a sleek metal structure. Resembling a monolithic form, the lamp can rotate up to 340 degrees, allowing both direct and indirect illumination depending on the desired atmosphere. Equipped with LED technology custom-designed for the lamp's internal geometry, Stick delivers efficient performance with a refined visual impact. The collection's rational yet playful character, both geometric and poetic, reflects a perfect synthesis of creative design and advanced technical expertise. Made in Italy.

Light source: 1x13.5W - Custom LED - 7500 Lm - 2700 K - CRI >90 - Dimmer on board

Dimensions

Ø11"3/8 x 71"7/8H | **Cable length:** 11"7/8 + 78"3/4

Finishes & Materials

Diffuser: Ribbed plexiglass.

Structure: Metal.

Cable: Fabric.
