

Stick

Design: Studiopepe

Description

Inspired by the simplest of shapes, the Stick Trio wall lamp originates from a basic triangular-section module repeated to create a refined and architectural composition. This essential geometry conveys fresh expressive power while maintaining a clean, minimalist aesthetic.

The Stick Trio wall version emits skillfully modulated light through a ribbed glass-effect diffuser contained within a sleek metal structure.

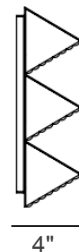

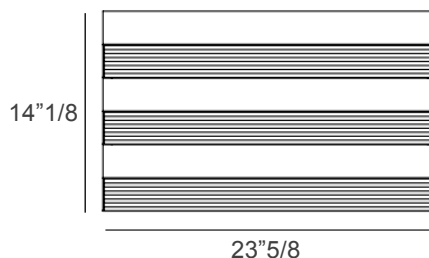

Characterized by minimal design and advanced technical craftsmanship, the Stick collection interprets lighting in its most artistic and evocative form. The lamp uses an LED module custom-made for its internal geometry, ensuring precise performance and refined visual continuity.

Made in Italy.

Dimensions

23"5/8W x 4"D x 14"1/8H

Light source: 3x27W - Custom LED - 7500 Lm - 2.700 K - CRI >90 - Triac Dimmer

Finishes & Materials

Diffuser: Ribbed plexiglass.

Structure: Metal.
