

# Mezz'aria

*Design: Daniele Lago*

## *Description*

The Mezz'aria suspended chair with armrests redefines lightness through its bold, architectural design, distinguished by the cantilevered rear seat that creates a dynamic and visually striking effect. The absence of rear supports, combined with the inclined leg structure, enhances its sense of suspension, while the integrated armrests add an extra layer of comfort and sophistication. This refined balance between structure and ergonomics makes it a standout piece of designer furniture for contemporary interiors.

Despite its airy appearance, the Mezz'aria chair is engineered for strength and durability, supporting loads of up to 180 kg and tested through 100,000 simulated uses. The generous upholstered seat, available in quilted or smooth finishes, works in harmony with the flexible frame to provide a soft, responsive seating experience. The subtle cushioning effect between the shell and the legs ensures lasting comfort, making it ideal for elegant living room furniture sets and refined dining environments.

Part of a versatile collection, the Mezz'aria chair with armrests is available with a wide range of customization options, including metal or wooden legs and various upholstery finishes. Its light aesthetic conceals a highly reliable structure designed for everyday use, offering a perfect synthesis of performance, safety, and innovation. This version integrates seamlessly into a curated luxury furniture collection, enhancing sophisticated family room furniture settings with contemporary Italian elegance and premium craftsmanship.

Made in Italy.
