

## Domus

*Design: Borgonovo + Valsecchi*

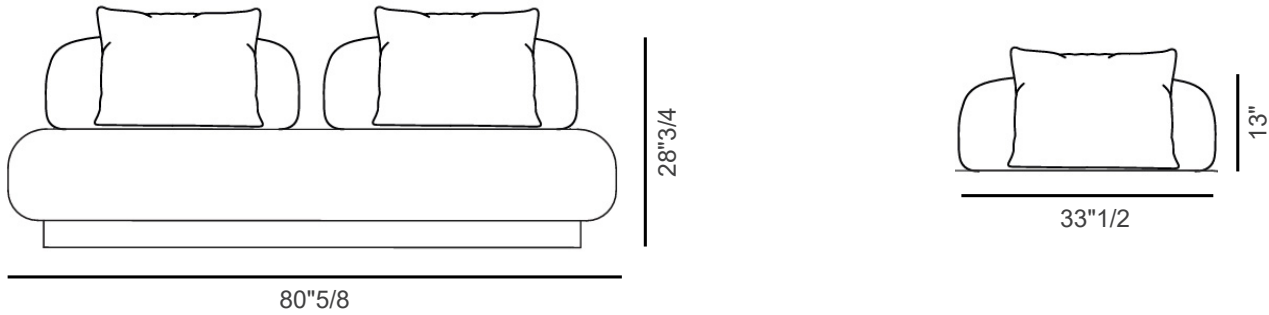

### *Description*

Designed by Borgonovo + Valsecchi for 2026, Domus is a contemporary modular sofa collection conceived as a flexible architecture of comfort, created to adapt naturally to the space around it. Available in the compact 205 two-seater version, the generous 290 three-seater version, and a sophisticated sectional composition with integrated table, Domus embodies versatility through soft sculptural volumes and refined modular design. Its distinctive backrests, inspired by the essential form of the traditional Japanese onigiri, introduce a sense of balance, softness, and understated elegance to the composition. The low-profile silhouette and enveloping upholstered forms create quiet living islands designed for both intimacy and connection, while the integrated table enhances functionality within contemporary interiors. Combining minimalist aesthetics, luxury comfort, and refined Italian craftsmanship, Domus transforms everyday living into a harmonious and sophisticated experience. Made in Italy.
