

# Stele

*Design: Andrea Andretta*

## *Description*

Stele, designed by Andrea Andretta for 2026, redefines multifunctional contemporary furniture through a refined balance of reflection, geometry, and sculptural elegance. Conceived as a mirror, side table, and tray in one sophisticated design piece, Stele adapts effortlessly to a variety of interiors and living environments. The fluid mirrored surface introduces softness and lightness, while the precise geometric tabletop creates a striking visual contrast that enhances its architectural character. Both functional and decorative, Stele transforms everyday utility into a refined design statement, combining versatility, contemporary Italian aesthetics, and premium craftsmanship in a compact yet expressive piece. Made in Italy
