

Address

Design: Cattelan Italia

Description

Modular bookcase designed for wall-mounted or floor-to-ceiling installation. Structure crafted from embossed lacquered steel, available in Titanium with Oxygrey details or Bronze with Oxybrass details. Round shelves are available in Canaletto walnut (NC) with a titanium embossed lacquered underside, or burned oak with a bronze embossed lacquered underside.

The modular design allows each shelf to be independently positioned at the desired height and orientation, enabling fully customized configurations for both wall compositions and freestanding room-dividing arrangements. The central steel support provides structural stability while maintaining a lightweight architectural appearance.

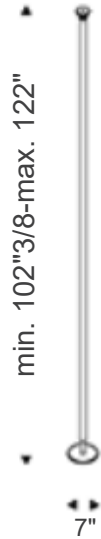

Suitable for residential and contract interiors, the system can be configured as a decorative display unit, storage bookcase, or sculptural partition. Maximum load capacity is 8.8 lb per shelf. Made in Italy.
