

Senator Keramik Magnum

Design: Cattelan Italia

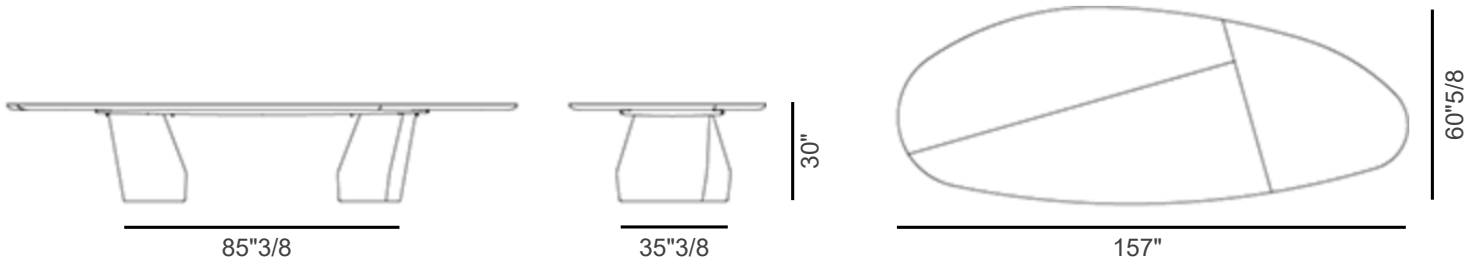

Description

The Senator collection is a family of statement dining tables that combines monumental proportions with exceptional Italian craftsmanship. Originally introduced as a large-format decorated glass table, the collection has evolved to include ceramic, wood, and round-top versions, offering a wide range of design possibilities for contemporary interiors. Defined by its architectural presence, Senator features expansive tops that showcase meticulous attention to detail. The wood and ceramic versions are characterized by an intricate composition of interlocking sections, creating a sophisticated pattern reminiscent of a handcrafted puzzle. In the ceramic models, the veining and decorative surfaces are carefully aligned to maximize visual continuity and decorative impact across the entire tabletop.

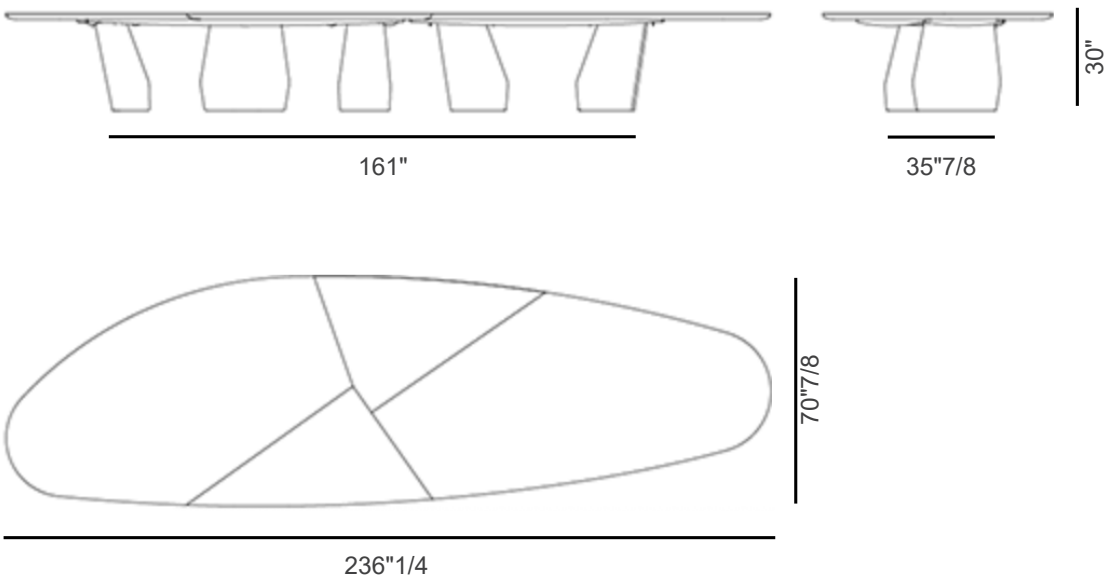

Available in rectangular and round formats, the collection pairs premium woods, marble-effect ceramics, and refined metal finishes to create elegant combinations that suit both residential dining rooms and prestigious hospitality settings. The sculptural base reinforces the table's imposing character while ensuring stability and balance, even in its largest dimensions. With its bold proportions, sophisticated materials, and striking visual identity, Senator is a luxury designer dining table that transforms any space into a statement of contemporary elegance. Made in Italy.
