Design: Cattelan Italia

Description

Standard coffee table with structure entirely crafted from curved bronze-finish glass. The design features an irregularly shaped glass top resting directly on a sculptural curved glass base, creating a seamless monolithic appearance.

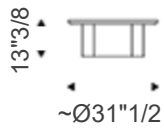

The tempered glass construction combines structural strength with visual lightness, while the bronze finish enhances depth, transparency, and reflection. The top's organic, asymmetrical outline contrasts with the geometric curvature of the base, creating a distinctive architectural aesthetic.

Suitable as a standalone coffee table or in combination with other sizes to create layered, multi-level compositions. Designed for contemporary residential and hospitality interiors where transparency, material quality, and sculptural form are key design elements. Made in Italy.
