

Barcode Sunbed

By Alessandro Dubini

Description

The Modern Barcode Sunlounger is a refined expression of contemporary design, combining elegance, comfort, and natural inspiration. Defined by clean, essential lines, its sculptural structure is shaped into two smooth curves that provide exceptional ergonomic support, allowing the body to rest naturally while ensuring maximum comfort for both the back and legs. Crafted from solid teak wood, the sunlounger showcases the distinctive design language of the Barcode collection. Wooden slats arranged at varying depths create a unique “barcode” visual effect, adding rhythm, texture, and architectural character while highlighting the warmth and durability of the natural material. Made in Italy.
