

Paloma

Design: Studio Boccaccio 432

Description

The Paloma Speakers are engineered as a natural extension of the Paloma integrated and modular Sound System, conceived to enhance and expand the acoustic performance of any luxury environment with exceptional power and absolute precision. Designed to bridge the gap between high-fidelity sound engineering and sculptural furniture design, these speakers are a spectacular addition to grand residential salons, private media rooms, or high-end hospitality lounges.

Finishes & Materials

Structure, base, decorative rings & profile: Lacquer.

Front Panel: Lacquer or Wood veneer.

Cone Leg: Acrylic

Paloma
