

Elephantino Office

Design: Neuland. Paster & Geldmacher

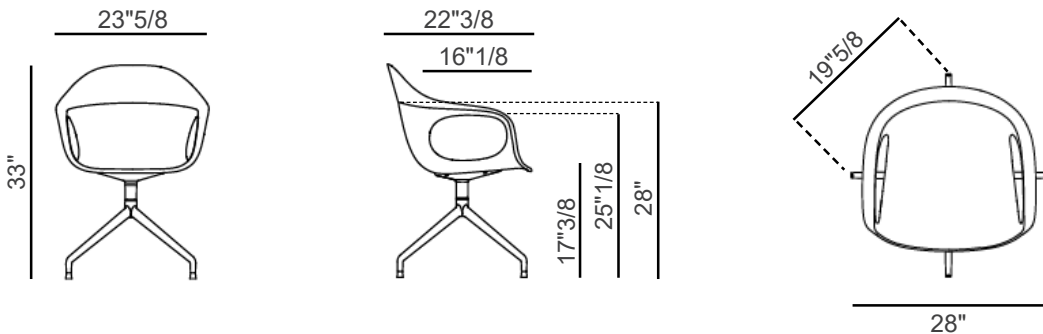

Description

The Elephantino Office Armchair features a shell molded from post-consumer recycled and fully recyclable plastic, making it suitable for both residential and commercial workspaces. It is available with three office base configurations: a swivel trestle base, a swivel trestle base with castors, or a 5-spoke base with castors.

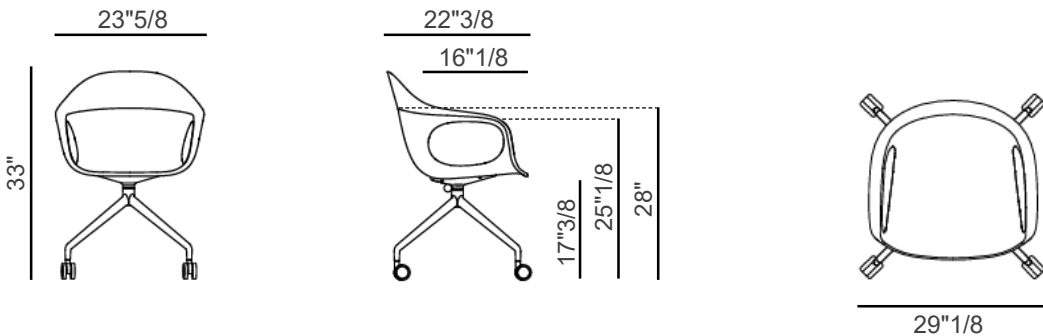

The swivel trestle base is fitted with standard glides featuring felt inserts to help protect wood flooring. The swivel trestle base with castors and the 5-spoke base are equipped with soft-tread, self-locking swivel castors that provide smooth rolling performance while automatically locking when the chair is not in use, enhancing stability and user safety. The chair's distinctive color palette is achieved through the unique composition of the recycled plastic, giving each shell a naturally muted appearance. Made in Italy.
