

Nivola Aero

Description

The Nivola Aero Edition is a professional driving simulator conceived as a contemporary collector's object where performance is expressed through purity of form and architectural design. Inspired by the principles of aerodynamic efficiency and modern engineering, it redefines the traditional racing simulator with a fluid, minimalist aesthetic that naturally integrates into sophisticated residential, executive and hospitality environments. Developed as Teckell's most advanced interpretation of driving simulation, the Aero Edition delivers an immersive and highly responsive driving experience while embodying the innovation, precision and design culture that distinguish Italian craftsmanship. Entirely designed and handcrafted in Italy, it represents the highest expression of technological performance within the Nivola collection.

Please note: This configuration is supplied without the display monitor, monitor support and simulation system.
