

Nivola Heritage

Description

The Nivola Heritage Edition is a professional driving simulator that combines advanced simulation technology with contemporary Italian design to deliver an immersive and authentic racing experience. Developed as a fully integrated driving platform, it recreates the ergonomics, precision and responsiveness of a real racing cockpit while seamlessly complementing refined residential, hospitality and executive environments. Entirely designed and handcrafted in Italy, the Nivola Heritage Edition represents Teckell's vision of transforming high-performance driving simulation into a sophisticated design object where innovation, engineering and craftsmanship coexist in perfect harmony.

Please note: This configuration is supplied without the display monitor, monitor support and simulation system.
