

Nivola Racing

Description

The Nivola Racing Edition is a professional driving simulator that translates the essence of motorsport into a sophisticated collector's object. Developed as a fully integrated driving platform, it delivers an immersive racing experience through precision engineering, immediate responsiveness and an ergonomically optimized driving position. Inspired by the language of circuit racing, the Racing Edition embodies a pure performance-driven philosophy while seamlessly integrating into private garages, collector spaces and exclusive environments. Entirely designed and handcrafted in Italy, it reflects Teckell's commitment to combining advanced driving simulation with contemporary Italian design.

Please note: This configuration is supplied without the display monitor, monitor support and simulation system.
