

Boby Trolley

Design: Joe Colombo

Description

Boby is a historic storage trolley designed by Joe Colombo, characterized by its dynamic design, modular structure, and high degree of versatility. The unit features an injection-molded ABS plastic structure composed of drawer and shelf modules, designed for simple vertical modularity and customizable storage configurations. It is equipped with 5 polypropylene swivel casters for easy mobility and is available in 4 different height solutions. Boby is part of the permanent collections of MoMA in New York and the Triennale in Milan and was awarded the Smau Prize in 1971. Made in Italy.
