

Basket Daybed

By Søren Rose Studio

Description

The Modern Outdoor Basket Daybed, designed in collaboration with Søren Rose Studio, offers generous space and inviting comfort with a distinctive sculptural expression. Its shell-shaped backrest creates an eye-catching silhouette, while the durable Cane-line Weave® and hot-dip galvanized steel frame provide a strong foundation for outdoor use. The spacious design offers plenty of room for relaxing alone or sharing the daybed with others. Soft Cane-line AirTouch cushions enhance the comfort and feature the QuickDry & Airflow system, allowing them to dry approximately one hour after a downpour. Made in the EU.
