

AIR-ALP0170 Ceiling Lamp

By Arteinmotion - Aeronautical Collection

Description

The Transitional AIR-ALP0170 Ceiling Lamp is created from an original 1973 Alpha Jet fuel tank, preserving its authentic aerodynamic form while transforming it into a striking functional centerpiece. Its mirror-polished surface emphasizes the tank's sculptural profile, while its impressive length of more than 138" gives the fixture a commanding presence. Designed for lofts, man caves, luxury homes, and other high-ceiling interiors, the AIR-ALP0170 is also well suited for illuminating large dining or conference tables up to approximately 118" long. Six adjustable LED spotlights provide focused, flexible lighting, combining aviation heritage with contemporary industrial design. Made in Italy.
