

AIR-BAR0060 Bar Counter

By Arteinmotion - Aeronautical Collection

Description

The Transitional AIR-BAR0060 Bar Counter is crafted from the engine cowling of a Boeing B-747, transforming an authentic aviation component into a distinctive bar counter or reception desk. The cowling features a mirror-polished finish that emphasizes its curved aerodynamic form and reflective surface. An extra-clear glass top is supported by six mounts, while the desktop and interior shelf are finished in black plexiglass for a clean contrast against the polished metal exterior. The AIR-BAR0060 creates a substantial sculptural presence while remaining fully functional as a bar or reception piece. Made in Italy.
