

AIR-ELI0146 Wall Propeller

By Arteinmotion - Aeronautical Collection

Description

The Transitional AIR-ELI0146 Wall Propeller showcases a two-blade wooden propeller by Sensenich, presented as a complete wall-mounted display with flanges, spinner, and support. The natural wood blades preserve the authentic character of the propeller, while the mirror-polished chromed components introduce a clean, reflective contrast. The AIR-ELI0146 creates a strong sculptural presence while maintaining the recognizable form and materials of the original aviation component. Made in Italy.

Finishes & Materials

Main Skeleton: Wood

Details: Metal
