

AIR-ELI0148 Wall Propeller

By Arteinmotion - Aeronautical Collection

Description

The Transitional AIR-ELI0148 Wall Propeller showcases a four-blade wooden propeller by Sensenich, presented as a wall-mounted decorative piece. Constructed from two two-blade propellers, it preserves the recognizable character of vintage aviation design while creating a bold sculptural presence. The natural wood blades are paired with mirror-polished chromed components, adding a clean reflective contrast to the warm finish of the wood. The AIR-ELI0148 brings authentic aviation character and strong visual impact to interior spaces. Made in Italy.
