

AIR-FUS0201 Bar Shelving

By Arteinmotion - Aeronautical

Description

The Transitional AIR-FUS0201 Bar Shelving is crafted from an original ATR aircraft fuselage section, reimagining authentic aeronautical construction as a functional bar display. The fuselage retains its recognizable curved form and four original window openings, preserving the distinctive character of the aircraft structure. Each window is converted into a leather-covered bottle display niche and illuminated with RGB spotlights. A mirror-polished finish enhances the reflective metal surface and emphasizes the fuselage's aviation heritage. The AIR-FUS0201 creates a bold large-scale statement while combining authentic aircraft design with contemporary display functionality. Made in Italy.

Finishes & Materials
