

AIR-MIR0190 Mirror

By Arteinmotion - Aeronautical Collection

Description

The Transitional AIR-MIR0190 Mirror is crafted from the upper section of an original Douglas DC-8 engine cowling, reimagining an authentic aviation component as a large-scale decorative mirror. Its sweeping aerodynamic curvature and polished metal surface create a strong sculptural presence while preserving the distinctive character of the original aircraft part. Measuring over two meters in both height and width, the AIR-MIR0190 is especially suited to lofts, double-height rooms, and homes with generous ceiling heights. The reflective cowling works together with the mirror glass to enhance light, depth, and a sense of openness within the surrounding space. Made in Italy.

Finishes & Materials

Engine Cowling: Metal

Mirror: Mirror
