

AIR-REA0088 Coffee Table

By Arteinmotion - Aeronautical Collection

Description

The Transitional AIR-REA0088 Coffee Table is crafted from an original Boeing B-737 engine exhaust mixer, reimagining an authentic aviation component as a functional centerpiece. The mixer retains its original finish, preserving the material character and engineering details of the aircraft part. An extra-clear glass top creates a practical surface while allowing the complex form of the exhaust mixer to remain the visual focus. The result is a striking coffee table that brings together authentic aeronautical engineering, industrial character, and contemporary furniture design. Made in Italy.

Finishes & Materials

Main Engine Mixer: Metal

Top: Glass
