

AIR-RECo022 Desk

By Arteinmotion - Aeronautical Collection

Description

The Transitional AIR-RECo022 Desk is crafted from the engine cowling of a Boeing B-727, reimagining an authentic aviation component as a functional reception desk. The cowling features a mirror-polished finish that highlights its sculptural shape while preserving visible rivets, access panels, and other original aircraft details. Inside, a black plexiglass desktop provides a practical work surface while contrasting with the highly reflective metal exterior. The AIR-RECo022 Desk combines genuine aeronautical character with a bold, contemporary presence. Made in Italy.

Finishes & Materials

Engine Cowling: Metal

Desktop: Glass
