

AIR-RECo049 Desk

By Arteinmotion - Aeronautical Collection

Description

The Transitional AIR-REC0049 Desk is crafted from the engine cowling of a Douglas DC-8, reimagining an authentic aviation component as a functional reception desk. The cowling retains its original curved profile and visible aeronautical detailing, enhanced by a mirror-polished finish that emphasizes its sculptural character. A black plexiglass desktop is integrated within the cowling, creating a refined contrast against the reflective metal surface. The AIR-REC0049 combines authentic aircraft engineering with contemporary furniture design, resulting in a bold statement piece for reception and interior spaces. Made in Italy.
