

AIR-RECo168 Desk

By Arteinmotion - Aeronautical Collection

Description

The Transitional AIR-REC0168 Desk is crafted from the engine cowling of a Douglas DC-8, reimagining an authentic aviation component as a distinctive reception desk. The cowling retains its characteristic curved profile and visible aeronautical details, enhanced by a mirror-polished finish that gives the piece a striking reflective presence. A black plexiglass desktop is integrated into the structure, providing a clean contrast against the polished metal exterior. The AIR-REC0168 combines genuine aircraft engineering with functional contemporary furniture design. Made in Italy.

Finishes & Materials

Engine Cowling: Metal

Desktop: Glass
