

AIR-TAV0052 Coffee Table

By Arteinmotion - Aeronautical Collection

Description

Description

The Transitional AIR-TAV0052 Coffee Table is crafted from an authentic Continental radial aircraft engine dating from the 1933–1970s period, reimagined as a distinctive piece of functional furniture. Carefully restored, the engine retains its recognizable mechanical form while taking on a refined contemporary presence. A mirror-polished finish highlights the engine's sculptural structure, complemented by chromed details and carefully painted cylinders that preserve its historical character. An extra-clear glass top provides a practical surface while keeping the engine fully visible, allowing its engineering details to remain the visual focus of the design. Made in Italy.

Finishes & Materials

Base Engine: Metal
