

AIR-AIRTAV0114 Coffee Table

By Arteinmotion - Aeronautical

Description

The Transitional AIR-TAV0114 Coffee Table is crafted from a Lycoming radial engine dating from the 1929–1950s period, reimagining its complex mechanical structure as a functional furniture piece. The radial arrangement of the cylinders remains fully visible, emphasizing the engineering character and distinctive form of the engine. Mirror-polished surfaces are complemented by chromed and painted cylinders, while the extra-clear glass top provides a practical surface without obscuring the components below. The AIR-TAV0114 combines aviation engineering with a refined contemporary presentation. Made in Italy.

Finishes & Materials

Radial Engine: Metal

Top: Glass
