

AIR-TAV0121 Dining Table

By Arteinmotion - Aeronautical Collection

Description

The Transitional AIR-TAV0121 Dining Table is crafted from a Jacobs radial engine dating from the 1933–1970s period, reimagining an authentic aviation component as a functional dining or conference table. The radial arrangement of the cylinders remains fully visible, preserving the mechanical character and engineering detail of the original engine. A mirror-polished finish is complemented by chromed and painted cylinders, while the extra-clear glass top provides a practical surface without obscuring the engine below. The AIR-TAV0121 combines aviation heritage with a bold contemporary presentation. Made in Italy.

Finishes & Materials

Base Engine: Metal

Top: Glass
