

AIR-TAV0165 Coffee Table

By Arteinmotion - Aeronautical Collection

Description

The Transitional AIR-TAV0165 Coffee Table is crafted from an original stage 2 engine fan from a Boeing B-737, reimagining a rare aviation component as a functional statement piece. The fan features a mirror-polished finish that highlights its aerodynamic form and intricate engineering details. Carbon fiber supports provide a strong visual contrast while supporting the extra-clear glass top and transparent plexiglass shelves. This combination of polished metal, carbon fiber, glass, and plexiglass creates a layered contemporary design that keeps the authentic aircraft component at the center of attention. The result is a distinctive coffee table that blends aviation heritage with modern materials and functional design. Made in Italy.

Finishes & Materials

Top & Supports: Top

Fan: Metal

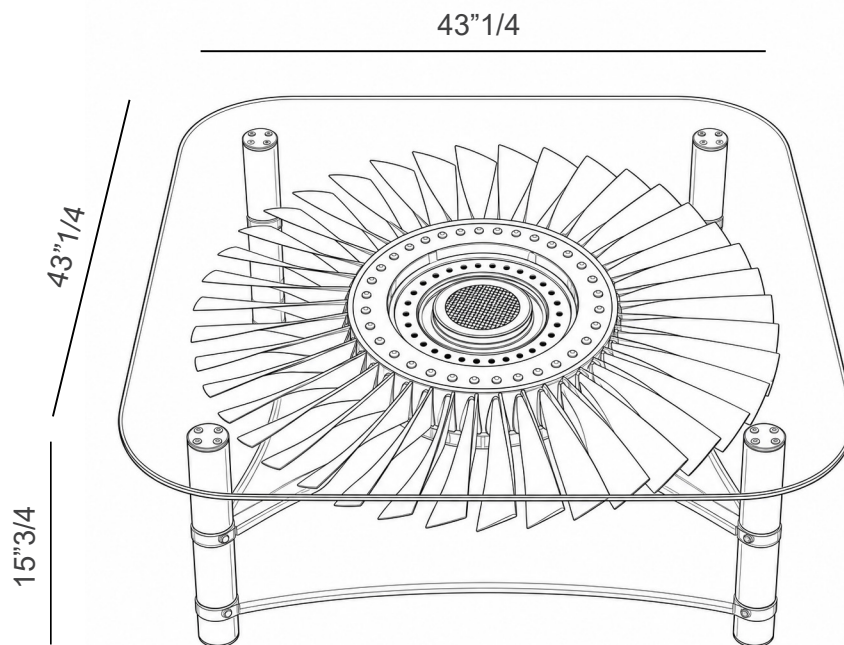

Legs: Carbon Fiber
