

AIR-TAV0204 Coffee Table

By Arteinmotion - Aeronautical Collection

Description

The Transitional AIR-TAV0204 Coffee Table is crafted around a Boeing B-737 engine compressor, reimagining an authentic aeronautical component as a functional piece of contemporary furniture. The compressor features a mirror-polished finish that highlights the intricate geometry and engineering of its fan blades. Carbon fiber supports, clear plexiglass elements, and an extra-clear glass top complete the structure while keeping the aircraft component prominently visible. The combination of polished metal, carbon fiber, plexiglass, and glass gives the AIR-TAV0204 a distinctive technical character while preserving the visual impact of the original Boeing B-737 component. Made in Italy.

Finishes & Materials

Top & Supports: Top

Fan: Metal

Legs: Carbon Fiber
